

arl Roller-Press Conveying SERIES

The producing process of EPS, XPS, the net waste material is usually banked and wasted. Now it can be recycled through ARL series by installing under the machine, it can catch the waste material directly and granulate and be automatic.

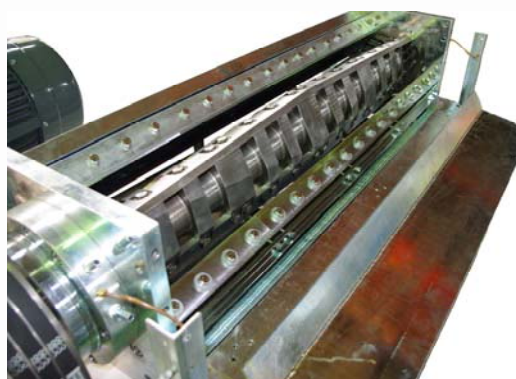

EPS、XPS 等容器在生產過程中，所產生的網狀餘料，以往都是堆積廢棄，現在可以透過 ARL 系列，安裝在成型機下方，立即接住餘料、立即粉碎，達成自動化目的。

Feature

- (1) Specially granulating for EPS & XPS
- (2) Can connect the production line, and granulate surplus material immediately.

特點

- (1) 專門處理 EPS、XPS 材質。
- (2) 與生產線連結，達成立即粉碎餘料效果。
