DLS SERIES

Tunnel Metal Detector

Germany made S+S

DLS
SERIES

CREATE PRACTICAL VALUE WITH MECHANICAL AESTHETICS

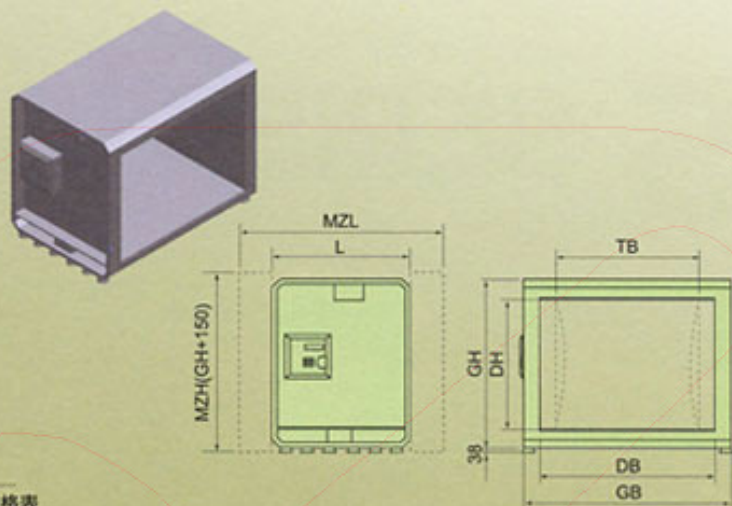

Metal detector is functional to avoid the metal inleakage during Plasticize process. For example, the screw damage from the injection machine, injection opener back-up, blade break, and etc. No only damage the machine, damage the production and enhance the maintenance expense. Therefore, DLS series is pre-checking and prevent the metal inleakage damage to increase the production smooth.

DLS SERIES

Tunnel Metal Detector

德國S+S製造

塑化加工的機器最怕生產過程中，金屬物質的滲入，它會多方面影響。例如射出機螺桿損壞、注射嘴阻塞、粉碎機刀具破裂、成品缺陷...等等。不僅破壞了機器設備，損失了生產力，更增加了維修費。所以 DLS系列可以在前製程中加裝，防止金屬滲入影響，並增加生產過程中的順暢。

System Specification 系統規格表

D H	MZL	TB	DB	GH	GB	L	Scanning sensitivity ϕmm												
50	400	300~600	TB+200	DH+230	DB+200	300	0.9	0.9	1.1	1.4									
100	500	300~600				300	1.1	1.2	1.4	1.5
