Connecting The Plastic Processing Facility

**0 | COMPETITORS**  
CANNOT FIND ANYONE ELSE LIKE PULIAN,  
SAYS OUR CUSTOMERS

**72 | TRANSFORMATIONS**  
CUSTOMIZED UNIQUE SOLUTIONS  
EXCLUSIVELY FOR YOU.

**20 | YEARS STOCK**  
EVERY PRODUCT DESIGNED TO LAST  
A LIFETIME.

**20 | YEARS EXPERIENCE**  
WHO EVER YOU ARE. WHAT EVER YOU DO.  
WE CAN HELP.

## 01 Brand New Image

Pulian is constantly growing and proving itself achieving outstanding performances in many different fields of work. Combining innovative thinking and consolidating the internal team elevates Pulian further to gain grounds in other new fields of work. The Pulian Logo's three solid lines signify three major mentalities of all Pulian Products, the three H's, "High Quality, High Efficiency, and High end Technology." These mentalities are what push Pulian products higher internationally, establishing itself globally as reliable and efficient. Over the years being recognized internationally along with gaining new experiences from ground breaking achievements gave Pulian many valuable experiences.

The courage to break tradition, to be innovative, to produce higher quality and value is the center stone of international success.

### Why Pulian?

Over 20 years in experience inheritance through cumulative experience coupled with creative and innovative thinking, establishing a dynamic ever evolving designing capability which gives us the ability to exceed customer's expectation with every project. Our expertise coupled with excellent communication and integration skills allows us to customize every machine according to your needs, ensuring and maximizing production capabilities to give you the edge in the market. Pulian utilizes ERP system to track and keep record of all our machinery parts which can be traced back over 20 years. We have the capability to stock a complete set of parts for all machines. Each part has its own serial code that we keep in our ERP system, you as a customer can rest assured that you will get a life time parts service, this is why you choose Pulian.

# 02

## Organization

**Excellent division of work that you can rest assured, the most intricate quality checking structuring.**

Pulian recruits related technology staffs with professional ability of developing to achieve competitive strength, meantime, we implement the consideration of humanity from supervisor to employer. We aggressively develop new models to catch up to industrial trend in the world; we believe that the offers come from demands of human, so we aggressively develop new products to get closer to the request from customer.

# 03

## Work Process

**Attention to all the fine details, insistent in fabricating precision quality.**

R & D is the basic fundamental of Pulian › it is with this fundamental that allows us to have the potential to design and customize machines that is globally accepted with many customizable aspects and functions, custom fit to operators needs. Using Solid edge 3D modeling, constantly using innovative technology and skills, Pulian is able to develop many mechanisms that have its own patents. Pulian is at the forefront in the industry in regards to easy operative machine interface, consideration to basic human anatomy, precision to all production details and utilized the most intricate skills.

# 04

## Quality Assurance

**Strict Quality Control, Superb Craftsmanship with Perfect Presentation**

Every machine that leaves Pulian is of the best intricate quality, each machine has its own unique personal identification number that allows us to fast track using our electronic ERP data base coupled with Pulian's complete parts stock can provide original factory parts as part of our complete aftermarket service. In the quality control aspect, whether it is a special designed machines or basic standard machines, Pulian only produce machines with superior performance of highest-level which shows Pulian's perfect presentation of rigorous craftsmanship.

# 05

## Dedicated Service

**With over 20 years experience, providing personal one on one, case by case service.**

In order to provide the best quality and service before and aftermarket sales, we opted "one on one service", "responsibility", "one on one case", and being "professional" as our service model. We can provide according to your needs, using face to face communication and coordination skills, clearly and carefully provide the most comprehensive plant planning to develop the entire plant that suits your needs. In regards to sheet metal and fabrication, we opt a "finish in one go" attitude to achieve perfect finished product. With over 20 years experience, we can provide a complete comprehensive before and aftermarket service, to solve your problems at one go!

# 06

## Resource Regeneration and Recycling

**Reuse of scrap resources, through design to re-tap its potential**

Pulian realize that we need to do our part in social responsibilities, utilizes environmental protection concepts in our designs for all our products, successfully innovate systems that are energy saving to re-sculpt scrap unwanted material to new usable material, increasing its value and save production cost. Most importantly we can accomplish "renew, reuse and recycle", to maintain ecological balance to be Green.

# 07

## Eye on the Future

**Create the value of the brand, linking profound relationship between countries**

Pulian is Customer-Orientated, that values the experiences and feed backs received from customers from over 100 different countries. A new age of services is upon us, from servicing customer from rubber and plastic manufactures as our main customer, till today, we have expanded to (food industry and recycling industry). Customization and one on one servicing model is our marketing model to better service our customers to create more effective machines and products. With our ever expanding global customers and partners, our services and products solidifies our position as being "professional, and reliable" getting praise from the global market, consequently solidifies our relationships with these international customers worldwide.

# WHAT CAN WE DO

## Business Items

Pulian International is constantly growing and improving, from a standard machine manufacturer evolving and upgrading, integrating cloud technology to upload data, to remote monitor and analyzing gathered data...In the field of customization machine systems and recycling field we have evolved into the mentality of "circulation economy" rather than "recycling". At this stage with a more dynamic new image, with a strong internal team as centripetal force, elevates our enterprise higher and higher towards the next new era of ambition.

# 01 GRANULATOR & CRUSHER SHREDDER & PULVERIZER

Pulian provides various granulator and shredder equipments over 200 models to satisfy customer demand. Granulators and shredders can be used in multiple ways and be adopted with every producing line, such as injection molding machine, blow molding machine, extrusion molding machine, recycling line. Also, the granulators can be used to grind IC, stick, lumber, board, cable, tire, film waste, food waste, EPS, PET bottles, PP/PE film, PVC/PP/PE pipe, etc. We also offer pulverizer to grind material to 10-40 mesh. Pulian's granulators & shredders equipments are the best products that you are looking for that will definitely meet up to your high request.

## 02 CENTRALIZED CONVEYING & ANCILLARY MACHINES

Centralized system is used to collect, dehumidify and deliver the material to any places in the factory and molding machine automatically. Therefore, centralized system greatly saves the space, reduces energy usage, as well as reducing labor cost. The centralized system highly achieves the automatic operation, and high efficiency in plastic industry. Pulian adopts systematic planning, combining all series of functional vacuum auto loader, controller, granulator, and blower to create the most reasonable and applicable automatic centralized conveying system.

## 03 TEMPERATURE & METAL DETECTION

The material needs to be cut into an appropriate size before throwing, then the material will easily enter the crushing room smoothly. We add magnet bar to avoid steel mixing into granulated material; meantime, during the processes of granulating, we offer dust separator to collect dust. For the blunt blades, we offer blade grinding machine to make blunt blades get sharp again after grinding.

## 04 AUTOMATIC STORAGING SYSTEM & ROBOTIC ARM SYSTEM

Automatic Storage system is designed by automatic access method for auto-entry and exit; reduce labor for transporting items. Refer to following classification to source a high efficiency automatic storage system to improve the management issue.

### Automatic Storing System & Robotic Arm System

- Construction : Trolley Shelf、Container Structure Shelf、Pallet Shelf、Cantilever Shelf、Drive-Through Racking Shelf
- Floor : High Layer- Above 12 M、Medium Layer-5~12M、Low Layer-Below 5M
- Pallet Capacity : Small Capacity-Below 1000 pallets、Medium Capacity-1000~5000 pallets、Large Capacity-Above 5000 pallets
- Access Method : Retractable Forklift Style、Belt Type、Shuttle Carriage Style、Robotic Arm System
- The advantage of Automatic Storage System application :
  1. Reduce the land area; Increase the height capacity of storage and area utilization percentage drastically
  2. Increase the Possibility of warehouse auto-entry and exit to improve warehouse efficiency
  3. Increase warehouse management to connect the broad variety of computer systems.
  4. The conditions including darker area, toxic room, and micro thermal or special location are workable to be applied by automated storage system.

## 05 GARGAGE SORTING & RAPID ORGANIC FERTILIZATION SYSTEM

Enviornmental pollution has been a global issue in regards to large amounts of unclassified and disposable garbage. Pulian offers a variety types of recycling system.Kitchen waste, excrement of agriculture, forestry, fishery & animal husbandry causes bacteria which is a threat to our health. We have developed a vast variety of different types of enzymes for biological rapid fertilization system.We turn these potentially harmful wastes into valuable, eco-friendly fertilizer to achieve eco-regeneration recycling waste management.

### Gargage Sorting & Rapid Organic Fertilization System

- Food Waste Rapid Organic Fertilization : Kitchen Waste Rapid Fertilization Machine、Kitchen Food Recycled System
- Agriculture, Forestry, Fishery & Animal Husbandry Rapid Fertilization System : Dead Chicken、Duck、Beef、Pig Rapid Fertilization Machine、Euthanasia Cat、Dog、Pig Crushing System、Animal Excrement Rapid Fertilization Machine、Feather / Fir Grinding Machine、Septic Tank Rapid Fertilization Machine

# 06 BIOTECHNOLOGY & MACHINE & PRODUCTS FOOD / MEDICAL MACHINES

In the field of food equipment, Pulian develops different type of automatic equipments to meet up requests from market. We pursue for the improvement of food manufacture and keep the taste of food in original. By going through every discussion with client in person, we offer client the products that satisfy them and help clients start up the new business.

# 07 RECYCLING SYSTEM & CUSTOMIZED MACHINES

Recycling wasted resources and turns it into higher value is always been the world trend in this century. Among Pulian's whole series of products, we design all series of recycling equipment, includes PET bottle recycling, PP/PE film recycling, EPS Styrofoam recycling, food waste recycling, water tank cleaning, spin dryer, wasted cable and wire recycling, wasted battery recycling, confidential and disc granulator, PCB board recycling, etc. We recycle back the material to achieve sustainable development.

## 08 JAPANESE SPECIFICATION MACHINES AND EQUIPMENTS

All series products are able to be made in Japanese Specification. Moreover, we are workable to offer Japanese Machines in all aspects from order receiving to shipping process. Persistently carry through to the end is our responsibility to provide integrity service for Japan market.
